**Attachments:** Interim Use Memo - Wind Power Project 08-19-19.pdf

Hey,  
We are getting ready to approve this Interim Plan for a wind power project lay down area on PArceL B5/B13. They've answered all my questions and addressed concerns about fencing the area off from the remainder of the site. They will be laying recycled concrete down as an interim cap. The concrete still needs to be processed, sampled, and approved as clean for industrial by our office before it can be placed on the site. Let me know if you have any questions or concerns about my approval.  
Thanks,

Effective, March 13, 2020, the State of Maryland is requiring Mandatory Telework for all Non-Essential Employees. During this period the best way to contact me is via email or to leave a voicemail at my direct line and allow me to return your call.

In addition to a mailed hard copy, please send digital copies of reports via email, if possible.

All,

Attached please find the Interim Use Work Plan for the proposed Wind Power Project site. This work plan details the activity necessary to prepare areas within Parcels B-5 and B-13 for interim use as part of staging and laydown areas in conjunction with the upcoming wind power project. Hard copies of the work plan are being sent out this evening and should arrive sometime tomorrow. If anyone has questions or would like to discuss this plan in more detail, please feel free to contact me directly.

Thanks

James
